DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 2, and 4-15 (renumbered 1-14) are allowed. The examiner's statement of reasons for allowance has been previously set forth in Paper Number 15, Page 4 (1st Paragraph) and Page 7, 2nd Paragraph). It is emphasized that the cord construction of Starinshak only includes a "to be melted" filament within the core area of said cord, such that a "to be melted" filament would be between laterally adjacent metallic filaments- the reference fails to suggest, disclose, or teach the inclusion of a "to be melted" filament in the peripheral layer of the cord construction, such that a "to be melted" filament is between peripherally adjacent metallic filaments. As recognized by applicant, support for this language is found in Figures 1A-2C. Furthermore, none of the additional prior art references of record suggested, disclosed, or taught the placement of a "to be melted" filament between peripherally adjacent metallic filaments in a 1xn cord construction. Thus, while the general use of a "to be melted" filament is known in the tire industry, as evidenced by Starinshak, one of ordinary skill in the art at the time of the invention would not have found it obvious to form the specific 1xn cord construction of the claimed invention in which a "to be melted" filament (polymer filament) is positioned between peripherally adjacent metallic filaments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
